PayPal Sandbox

API Credentials

You must have credentials to test APIs for PayPal Payments Pro and Express Checkout in the Sandbox. In most cases, you will use API signatures and not download certificates.

The test accounts identified below are enabled for API access.

Note: These credentials will not work outside the Sandbox. You will need new credentials from paypal.com to go live.

Go to Payment Card Credentials

Test Account		Date Created
Test Account:	**eggsal_1355347349_biz@gmail.com**	Dec 12, 2012 13:22:52 PST
API Username:	eggsal_1355347349_biz_api1.gmail.com	
API Password:	1355347372	
Signature:	AuqQWVMHXtkqfW9NKPFHj8FHvGiOAAuEwsy-1L6sLz47vZEL0nd-PY52	

To download the certificate, log into the sandbox test account profile and remove the 3 token credentials associated with the account. For more information, refer to the Sandbox User Guide.

Payment Card Credentials

Top of page

You need to have credentials to test in-store checkout with a payment card in the Sandbox.

The test accounts identified below are enabled for in-store checkout.

Note: These credentials don't work outside the Sandbox. You need new credentials from paypal.com to go live.

Test Account	Date Created
Your test accounts do not have credentials.	
To get started with Payment Card in Sandbox, you must first create a buyer test account and enable in-store checkout.
